SALINAS WHITE

GRANITE

BRAZIL

SALINAS WHITE

Description

Salinas White, similarly to the Alaska White, is an exquisite granite by its whiteness and softness; an excellent alternative to white marble. The stone's contrast is reduced by its silver highlights, softening the transitions between colors for a more harmonious result. This attractive Brazilian stone is most appreciated for countertops as well as a large variety of residential and commercial applications.

Brazil is one of the largest exporters of natural stones in the world, and without a doubt, one of the largest exporters of granite. A country abounding of mythical landscapes that have travelled the globe, and thanks to this stone, will grace the homes of those lucky enough to incorporate it into their decor.
