TAN BROWN

GRANITE

INDIA

TAN BROWN

Description

Tan Brown is extracted in a quarry near the city of Karimnagar, in the state of Andhra Pradesh, India. The size between lots is mostly constant, but the level of quartz contained in the stone can vary. This granite is mostly brown with black and grey spotting. It is excellent for a wide array of residential and commercial applications.

India has several granite quarries, divided into two large territories: north and south. The main granite reserves are found in the states of Rajasthan, Andhra Pradesh, Kamataka, Tamil Nadu and the new state of Telangana.
